IEEE CIBCB 2025

2025 IEEE Conference on Computational Intelligence in Bioinformatics and Computational Biology

National Cheng Kung University, Tainan, Taiwan
August 20–22, 2025

CALL FOR TUTORIAL PROPOSALS

AI Drives Biomedical, Bioinformatics and Healthcare

The Organizing Committee of the 2025 IEEE CIBCB invites proposals for Tutorial Sessions to be held as part of the conference. Tutorials provide an excellent opportunity for participants to explore emerging topics, acquire new skills, and gain a deeper understanding of cutting-edge research in computational intelligence, bioinformatics, and computational biology. **We welcome proposals from experts in academia and industry on topics relevant to the conference themes.** Proposals should cover foundational knowledge, advanced methodologies, or applications that are likely to attract a broad audience, including students, researchers, and practitioners.

Proposals should include the following information:

- **Tutorial Title**: A concise and descriptive title.
- **Organizers' Details**: Names, affiliations, contact information, and a brief biography highlighting relevant expertise.
- **Tutorial Abstract**: A summary of the tutorial, including its goals, target audience, and expected outcomes.
- **Outline and Duration**: A detailed outline of the topics to be covered, along with the estimated time for each section. Tutorials may range from 1.5 to 3 hours.
- **Special Requirements**: Any specific technical or logistical needs (e.g., software, hardware).

Proposals must be submitted by Jan 10, 2025, to
Pau-Choo Chung (pcchung@ee.ncku.edu.tw) and
Tayo Obafemi-Ajayi (TayoObafemiAjayi@MissouriState.edu)
We look forward to your contributions to making the IEEE CIBCB 2025 a vibrant and educational event!
